

Tencent Meeting (VooV) — Speaker Guide

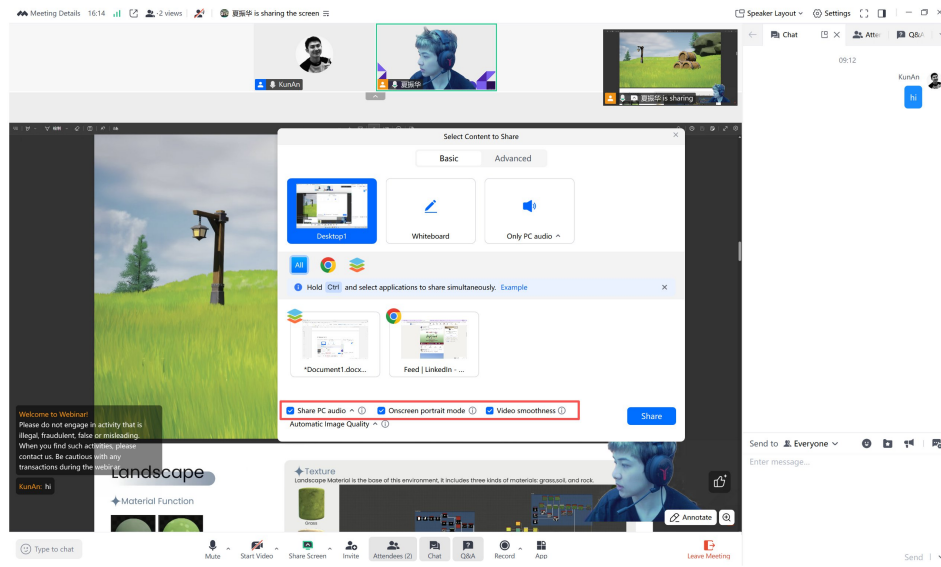

1) If you are logged in on PC, try move your mouse to the bottom of the app screen, it should reveal a toolbar where you can:

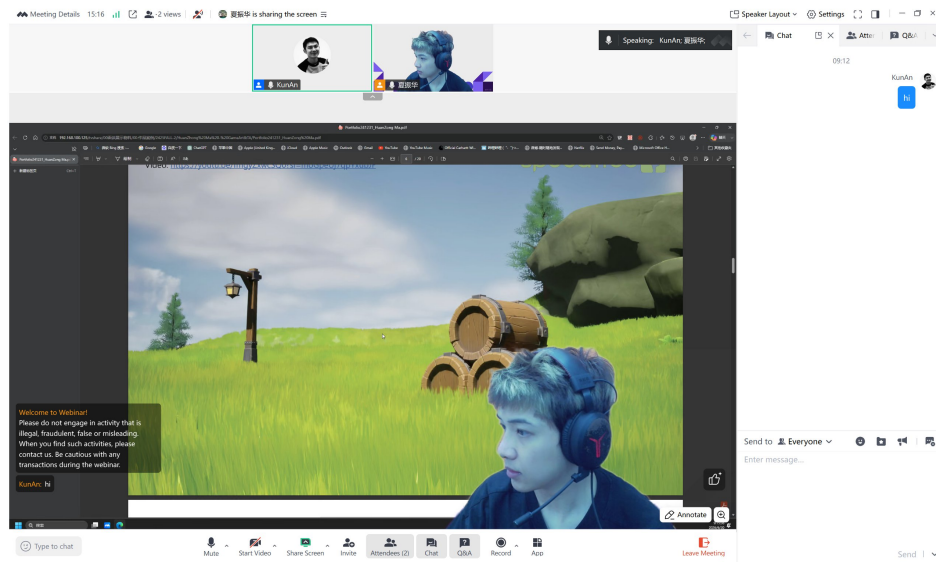

- Turn on/off your microphone
- Start/Stop Video
- Share Screen
- Check on Chat
- Check on Q&A
- Turn on Real-Time Transcription (Under App icon)

2) After click the share screen button, make sure you have turned on the following options:

- Share PC audio
- Onscreen portrait mode
- Video smoothness

3) Result of Onscreen portrait mode

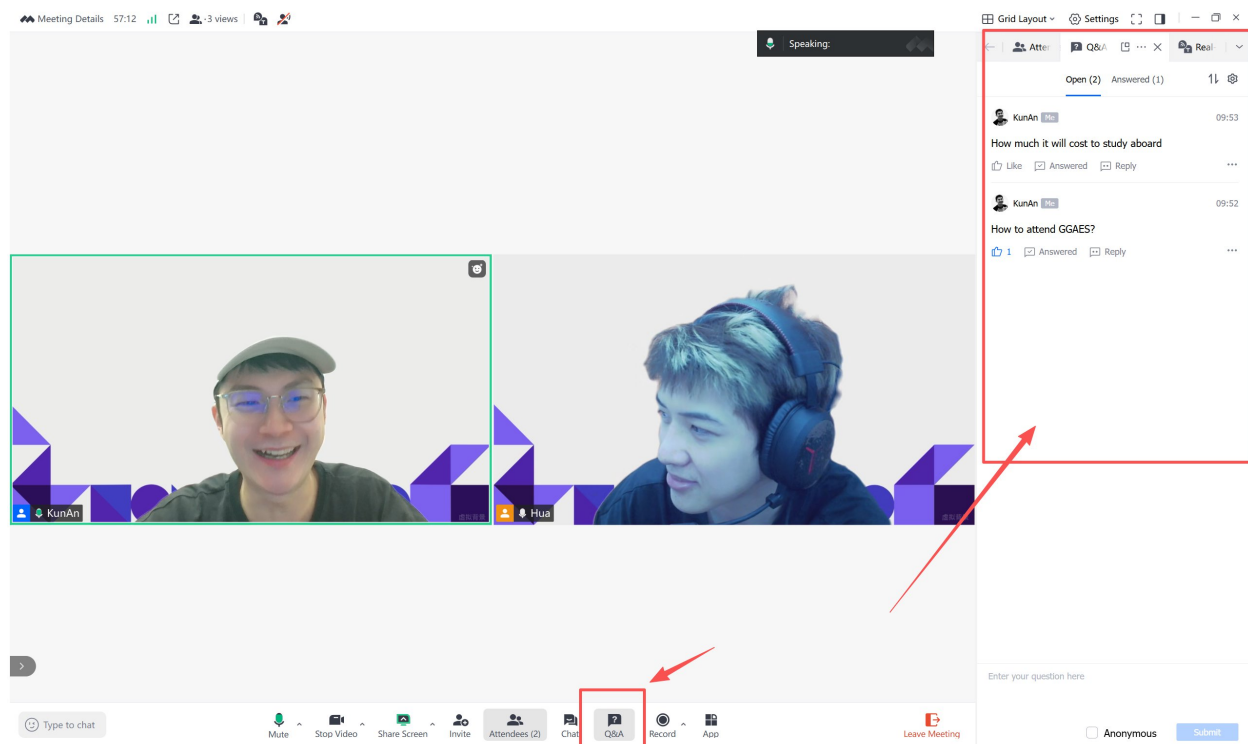

Recommended (especially when walking through slides), but feel free to use whatever you're comfortable with.

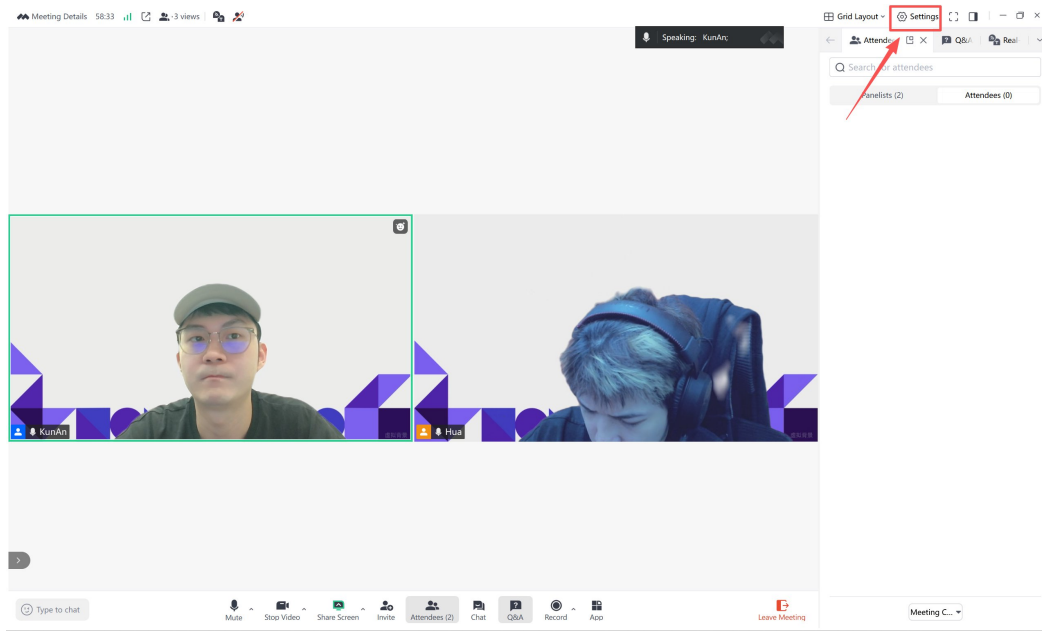

4) If you want to stop share screen mode, you need to move your mouse to the central top of the screen, the hidden mini-toolbar will appear; then click the red STOP button.

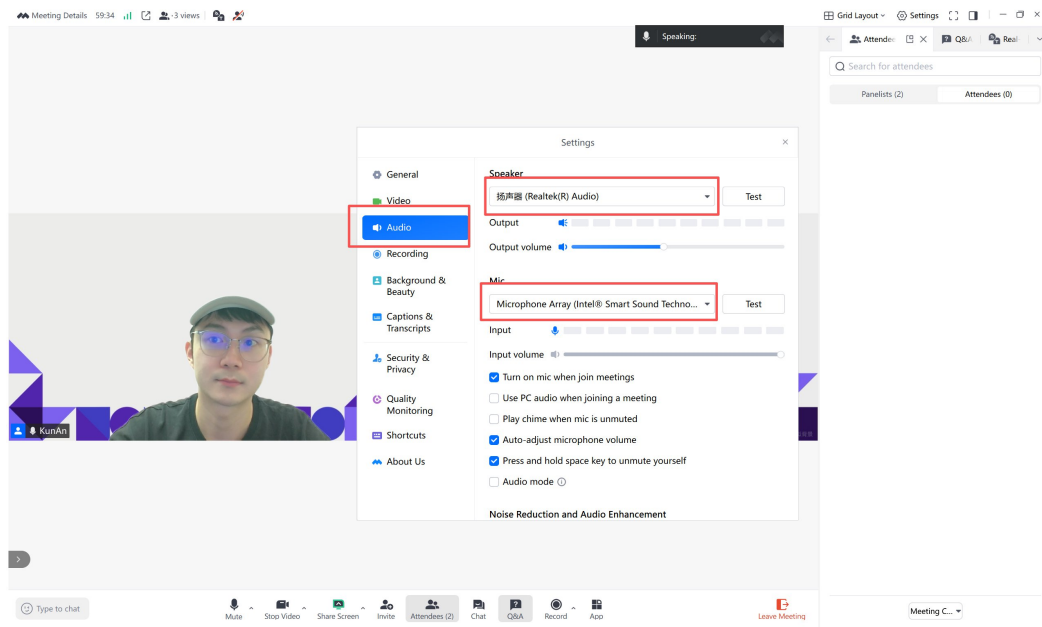

5) Tencent Webinar has Q&A function which allowing attendees to ask questions, if you have a co-speaker it is good to have the other speaker to help answer, if not our team will have someone whom with BC agent cert to answer general questions in related to admission, study abroad and basic portfolio guide in Chinese.

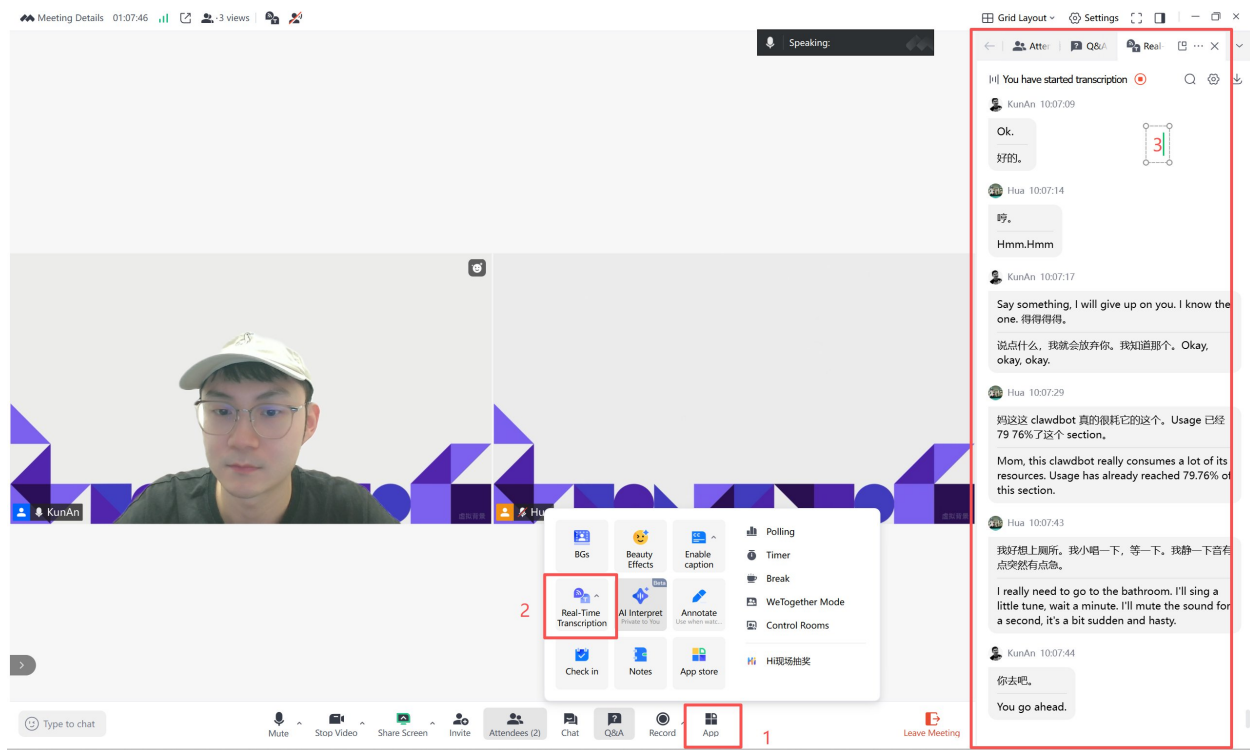

6) If you encounter a technical issue in related to microphone or webcam, and needed to go to the Setting, located in the top right corner.

You will be able to find miscellaneous features and setups here including beauty setup :D

7) There is a Real-Time Transcription function under App icon. It can do language translation from Chinese to English & English to Chinese. Extremely helpful to communicate/understand with audiences.

8) If Your Connection Becomes Unstable

1. **Notice early** — choppy audio or frozen video means it's time to act, don't push through.
2. **Lower bandwidth** — turn off camera first (audio matters most), then stop screen share if needed, and close other apps using the internet.
3. **Check network** — move closer to the router, use a wired connection, or switch to a phone hotspot if Wi-Fi is weak.
4. **If it keeps cutting out** — hand over to your co-speaker or our team, then rejoin.
5. **If disconnected** — stay calm and rejoin with the same link; our team will cover until you're back.
6. **Keep us posted** — drop a quick note in the chat (e.g. "lagging, camera off") so we can support you.

Bandwidth, heaviest → **lightest**: camera + screen share + audio → screen share + audio → audio only
